Sample class descriptions from previous terms:

Students warm-up to the developmental patterns of dance and prepare their mind and body for creative dance. They explore place, size and levels, directions and pathways of movement. They dance quickly and slowly, sharply and smoothly and create straight, twisted, round and bent movements. They create patterns and phrases of movements that they perform in rhythms from around the world. They learn to mirror and shadow each other as they cooperate and discover creative movement solutions together.

- Jody Cassell

This class will nurture your young dancer's social skills and ability to move safely, both of which are helpful for future dance classes in any genre. Each class includes: warm-ups based on universal developmental movement patterns, activities that familiarize them with safe rolling, jumping and falling, as well as games and exercises that nurture sharing and teamwork skills. The class only has three rules: be safe, be kind and have fun!
