

Audio Equipment

Last Updated: January 30, 2025

The Reinhart Studio and the Myers Studio each offer a high-quality, well-designed, and user-friendly audio system that includes:

- A **permanent audio playback system**, featuring a professional-grade CD player and an iPod connection.
- **Ceiling speakers** installed throughout each studio for even audio coverage.
- **Simple volume control knobs** on the front of a mixer/amplifier for ease of use.
- A **mobile furniture rack** to house all equipment securely and accessibly.
- **Wireless audio transmission** from the mobile rack to the speaker system, allows flexible placement of the rack near any power outlet.
- **Permanent amplifiers** in each room with wired connections to ceiling speakers.

Audio Set Up

(both studios)

Audio Components:

- (1) **JBL CSM-14** - 4-input audio mixer
